Total Incidents: 285

Today's Incidents: 285

Active Violations: 0

## Incident Summary

This executive summary outlines safety incidents recorded across the factory from all time up to 2026-07-23. A total of 200 incidents were reported during this period, indicating a consistent need for vigilance in maintaining safety standards.

A detailed review of the incident data shows that 'no-hardhat' was the most common violation, occurring 108 times. Furthermore, the Assembly Line registered the highest number of incidents with 98 events, making it a key area for immediate safety review. Other notable violations included 'no-mask' with 89 instances and 'no-safety vest' with 88, while the Packing Area and Warehouse also reported significant incident counts of 97 and 90 respectively. These findings highlight critical areas for targeted intervention to improve overall workplace safety.

## Violations by Type

| Violation Type | Count |
|----------------|-------|
| no-hardhat     | 108   |
| no-mask        | 89    |
| no-safety vest | 88    |
